

STOCK EXCHANGE TOWER EMERGENCY

POWER FAILURE

Stock Exchange Tower is equipped with a diesel powered generator which, in the event of a power failure, will automatically supply power to the life safety systems.

Power will be supplied to two (2) emergency elevators (one low rise and one high rise), the fire pump and emergency lighting.

The Emergency Fire System has a full battery back up in case of a power failure as well.

You will be advised by way of the public address system, on the expected duration of the power outage as soon as this information is available from the City of Calgary.
